

We make IT happen

TRIGONO XN01

The new era of modular computing

TRIGONO XN01 is a convertible laptop based on Intel's NUC Elements. The Element, a compact and powerful technology, consists in a module which includes the CPU, memory and Wi-Fi.

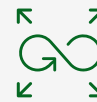

The new era of modular computing

Enables the upgrading of NUC Elements while maintaining the same chassis, or switch to a different chassis while keeping the same NUC Elements. Choose from 7 different NUC Elements and storage options.

This modular approach allows to extend the device's lifecycle drastically while promoting the reduction of technological waste, offering a new ecological approach to computing.

If the barebone gets damaged, the user can switch to a different one in a matter of minutes, without losing any data or apps. If NUC Elements Module fails, the user can replace the module – there will not be a loss of data in case it has an external SSD. The keyboard and battery are easily replaceable.

**LEASE TO
OWN** 

On lease to own options - Preventive maintenance for duration of the lease. Extended warranty for the period of the lease and all risk insurance to mitigate accidental damage and theft.

**MODEL****Tigono XN01****SCREEN**
